Access to Quality Care

Priority Area: Equitable and Sustainable Access to Care

Goal Statement: To improve equitable and sustainable access to care for NJ residents

Theme: Clinical Care & Healthcare

Sub-theme: Access to Care

“When my brother was ill with COVID, I took him to the hospital, and because he does not have health insurance, although we arrived first, he was the last to be called. My brother was coughing loudly, and another man arrived behind him like 15 minutes later [...] they asked him if he had health insurance and he said yes, so he was allowed to pass first, and my brother was left until the end. [...] You see those cases and one thinks, help is definitely not the same for everyone, especially for those who don’t have health insurance.” (Participant 075)
DISCUSSION

• How do you want the ACTs to communicate updates?
  • Quarterly, during HNJAC meetings, where ACT chairs present?

• How should we give the Community Conversations info to the ACTs?
  • Do HNJAC members want to “filter” the info to them?

• Equity, policy, and resilience teams

• Annual report of how each ACT is addressing equity, policy, and resilience?

• Public comment period? How and when?
